Student Engagement in Wayground

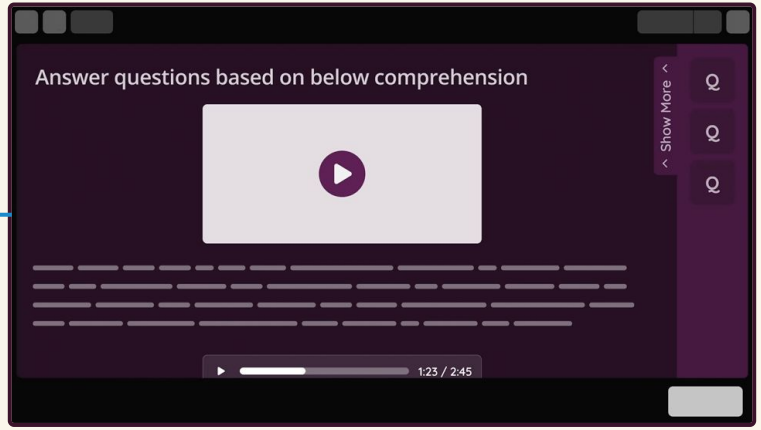
WAYGROUND
formerly Quizizz

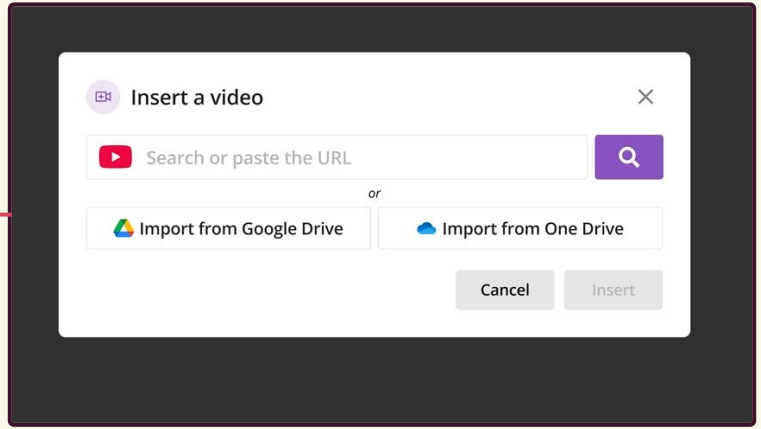
Session overview

1. Actual classroom footage of teachers creating those *"**aha moments**"*
2. ***Strategies that motivate*** every student, not just the loudest or fastest
3. ***Clear data*** that helps you (and them) celebrate genuine progress

Instructional hub

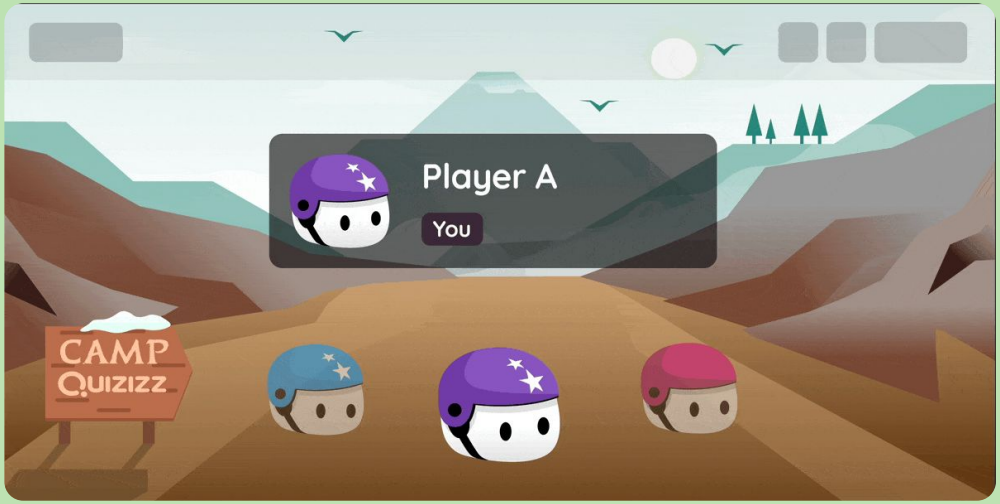
- Assessment
- Presentations
- Passages
- Videos
- Flashcards





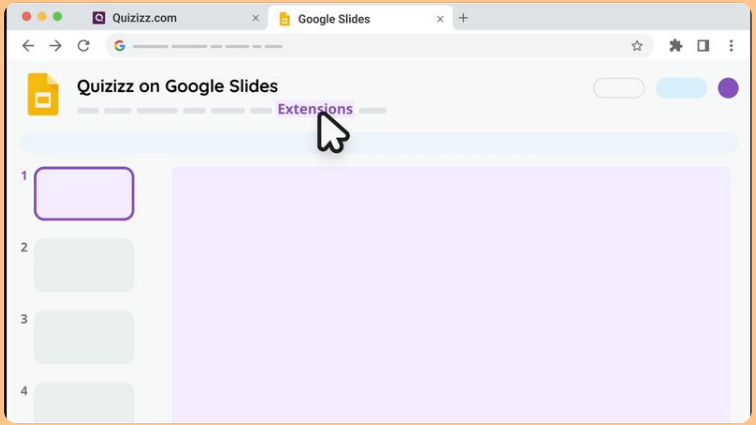
Assessments

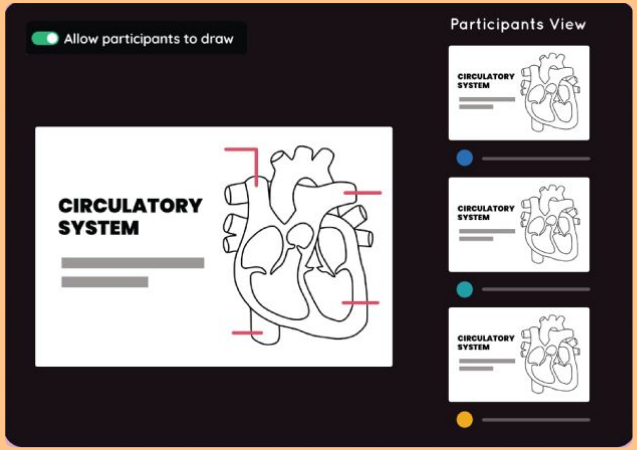
- Multiple game modes
- Engage on any device
- Powerful reports for formative diagnostics



Presentations

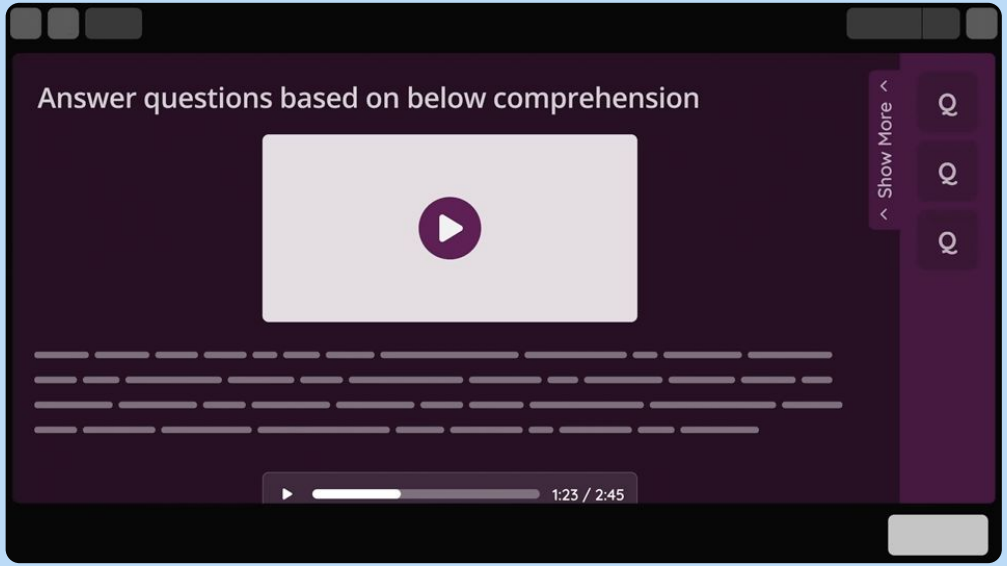
- Display your slides on student devices
- Make presentations interactive
- Make lessons engaging with: Spin the Wheel, Interactive Whiteboards, and Lesson Toolbox





Passages

- Incorporate literacy across the curriculum
- Create questions from your favorite reading material
- Select a narrative style from fiction and non-fiction options

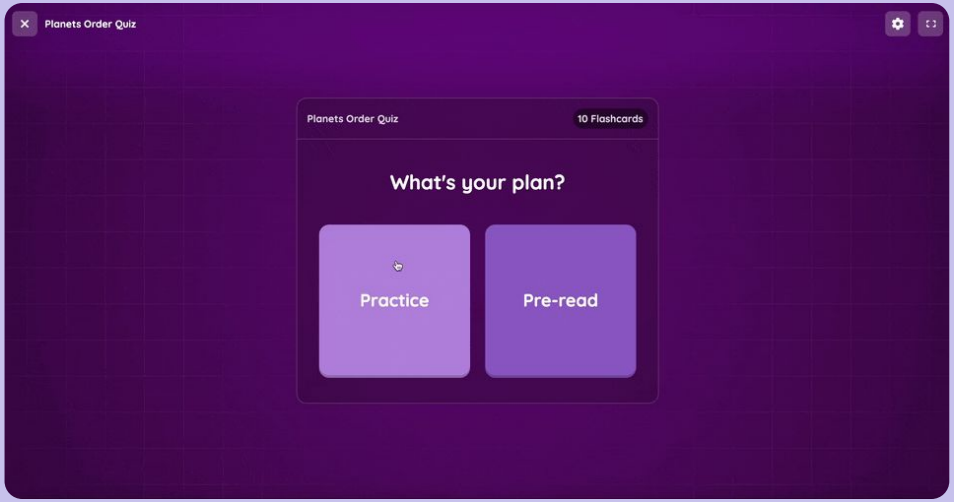


Interactive videos

- Create even quicker with AI-generated questions
- Re-teach concepts
- Assign as homework

Flashcards

- Active recall and repeated exposure to information which supports long-term retention.
- Two modes
- Practice mode
- Pre-Read mode



Engaging Modes

1

CLASSIC

Competitive and gamified

2

MASTERY PEAK

Knowledge over speed

3

INSTRUCTOR PACED

Teacher-centered activity

4

TEAM MODE

Working in groups

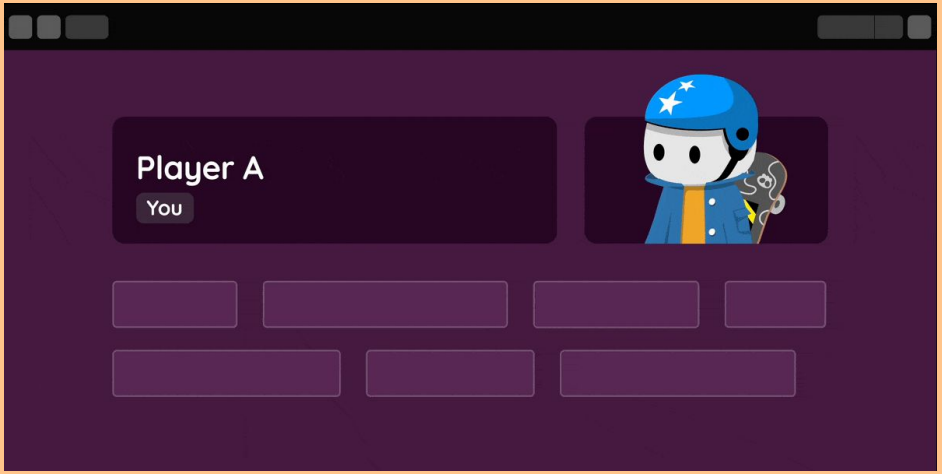
5

PAPER MODE

No student devices required

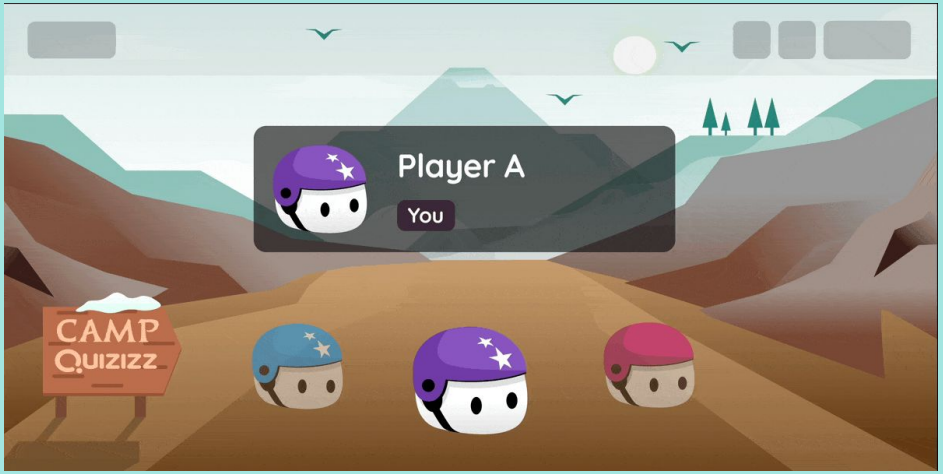
Classic Mode

- A classic game mode where students answer at their own pace and you see a leaderboard with live results.
- Educators can also use fun memes to keep students engaged.



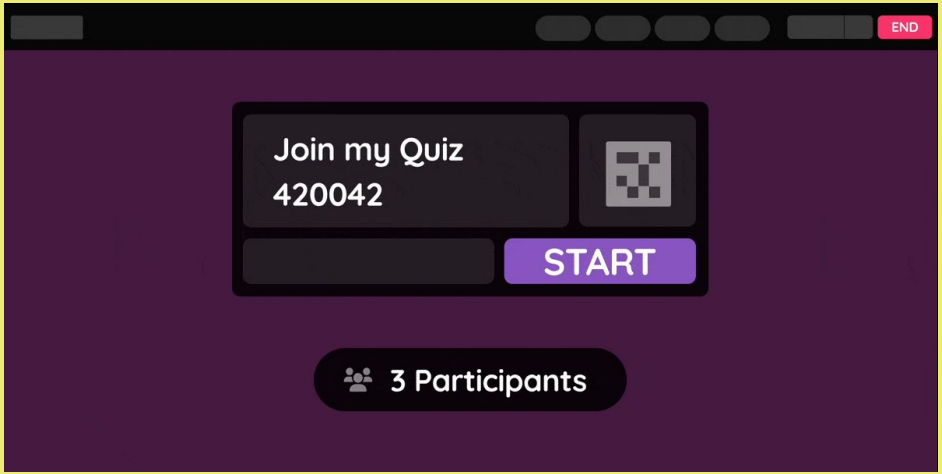
Mastery Peak

- A gamified mode featuring repeated practice where students play at their own pace and progress based on skill mastery.
- Teachers observe progress in real time.



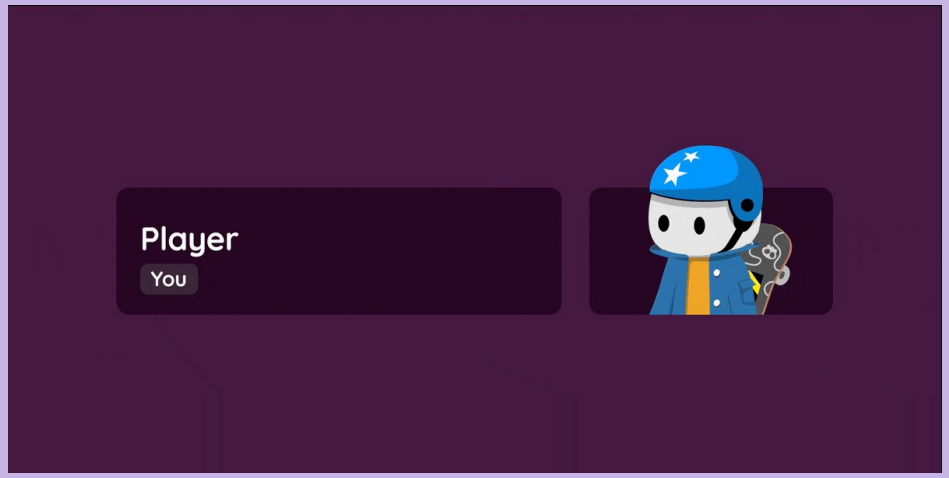
Instructor Paced

- Control the pace so everyone advances from one question to the next.



Team Mode

- Individual students answer at their own pace, but scores are grouped by the collective team.
- Teachers can edit teams to fit class needs.



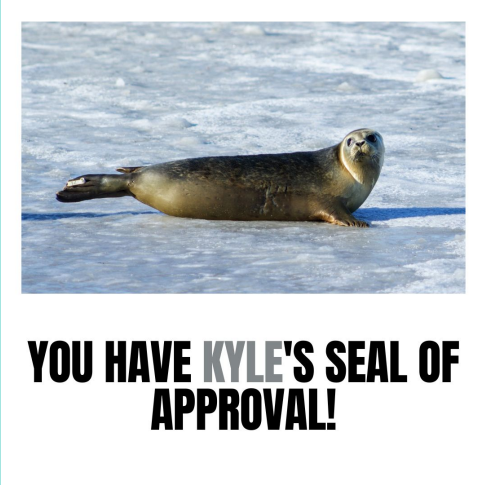
Paper Mode

- Pre-print unique QR codes for each student.
- Project questions on your computer and scan student responses using the Quizizz mobile app.

Memes

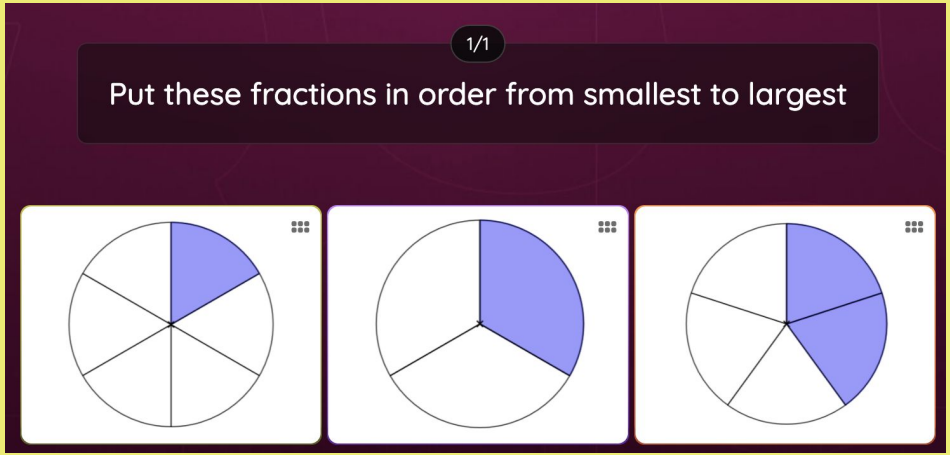
- Create personalized fun meme templates to make your students smile!
- Powered through a partnership with Canva
- Template to create your own!

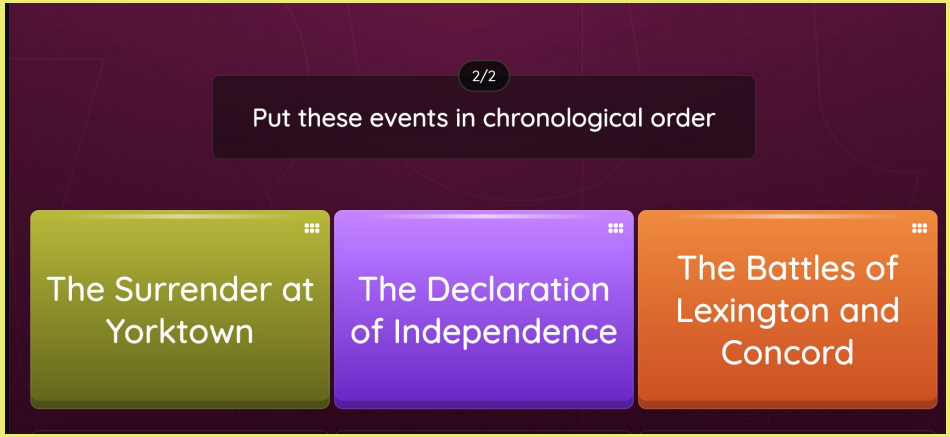
Canva for education | PARTNER



Reorder

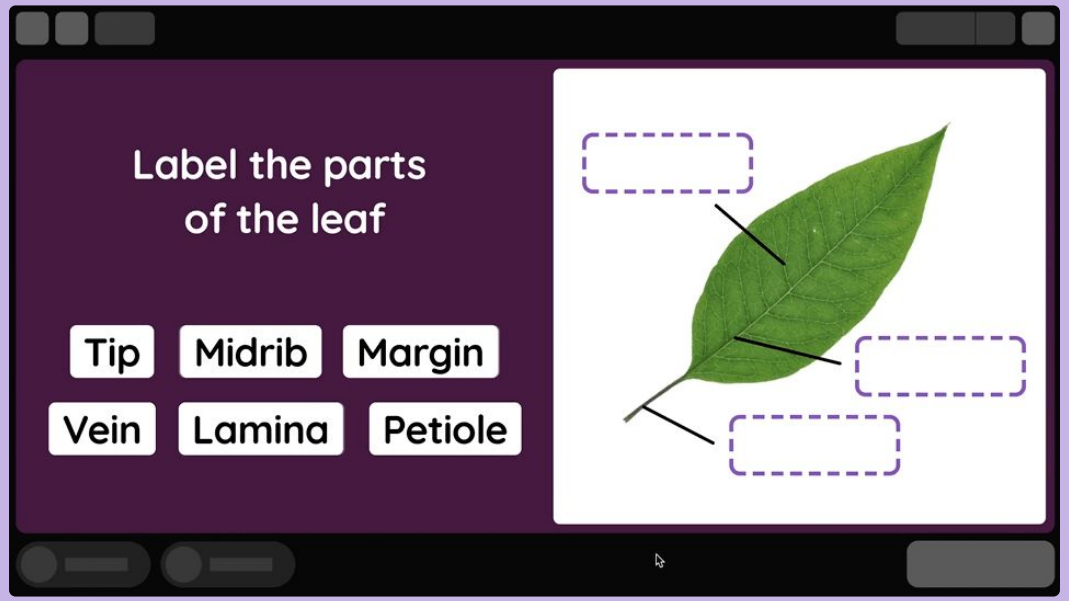
- Students engage with concepts physically as they reorder the words or images





Labeling

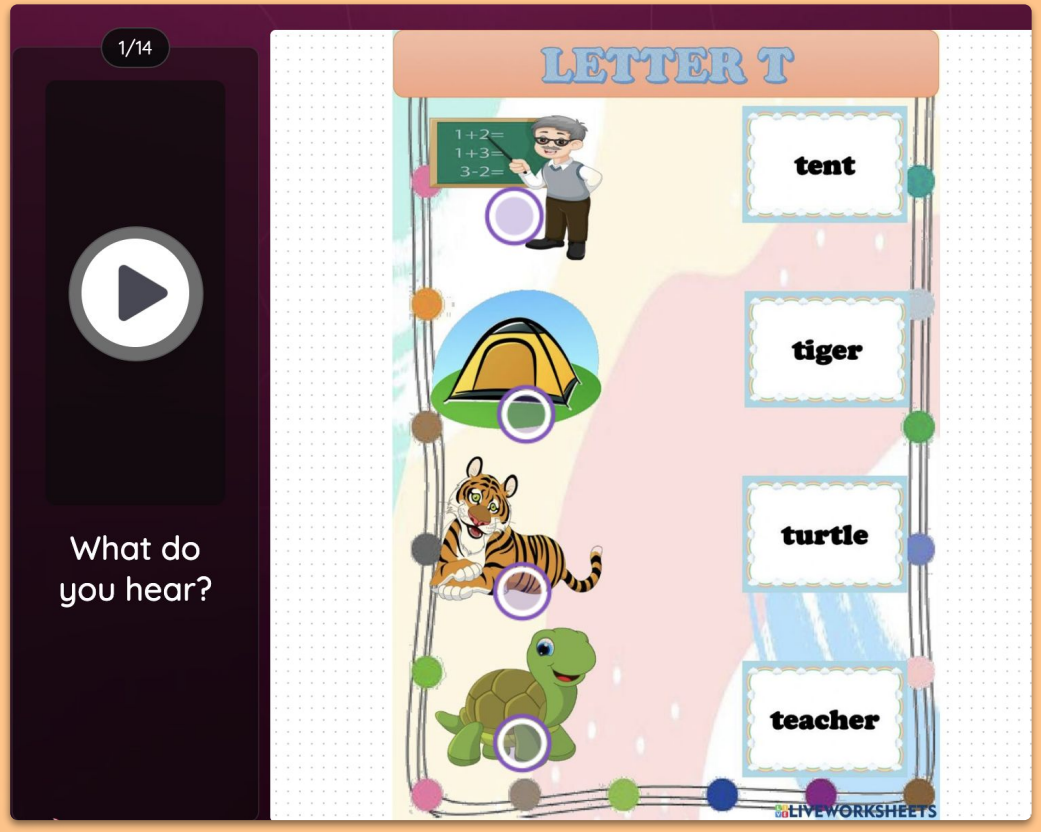
- Drag and drop labels onto any picture! Great for math and science diagrams, parts of a sentence, maps and more!



Generate new label names automatically

Hotspot

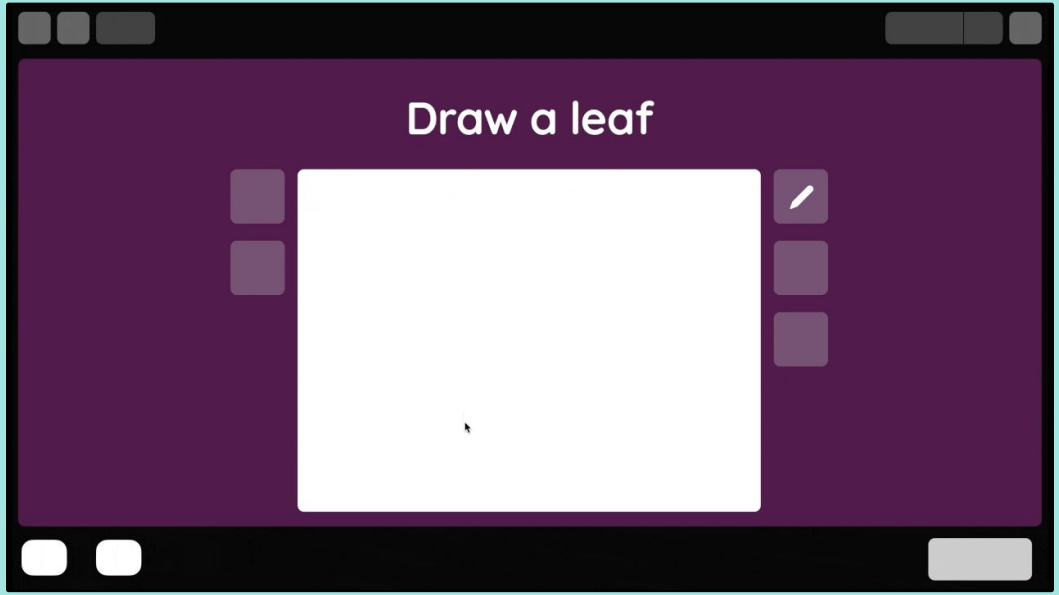
- Upload images and have students identify a specific area in that image.



Identify and create hotspots automatically

Draw

- Nurture creativity and recall as students draw a plant cell, mark locations on map, or solve a math problem.



Wayground helps you

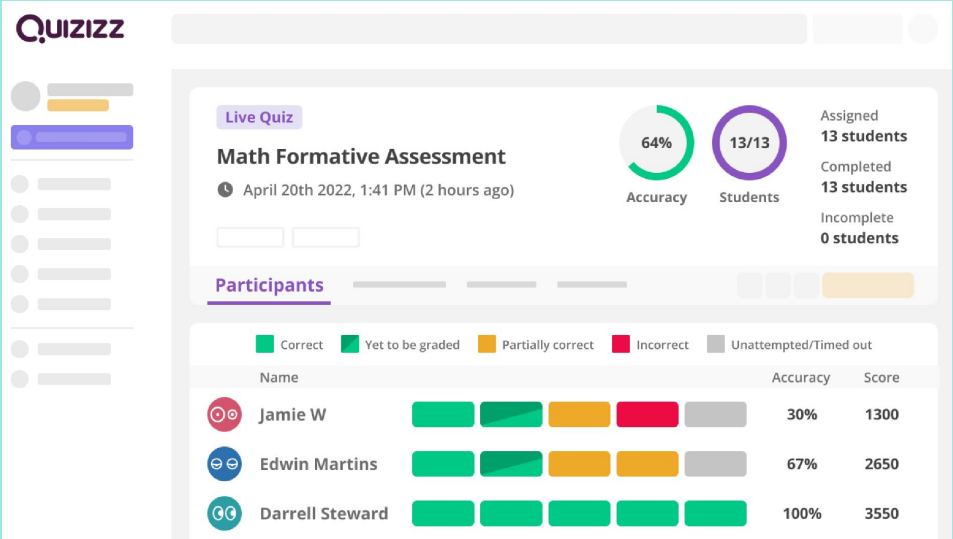
Gather data

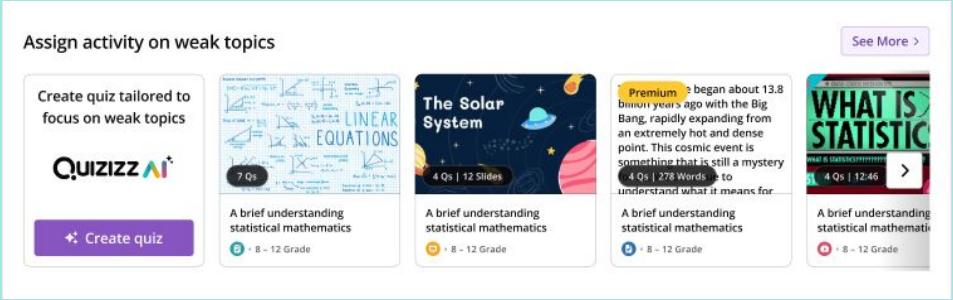
Quickly and efficiently

Data

Gathering data and using it to plan accordingly can take a lot of time! Wayground can surface this instantly allowing for your teachers so that they can quickly assist students that are struggling.

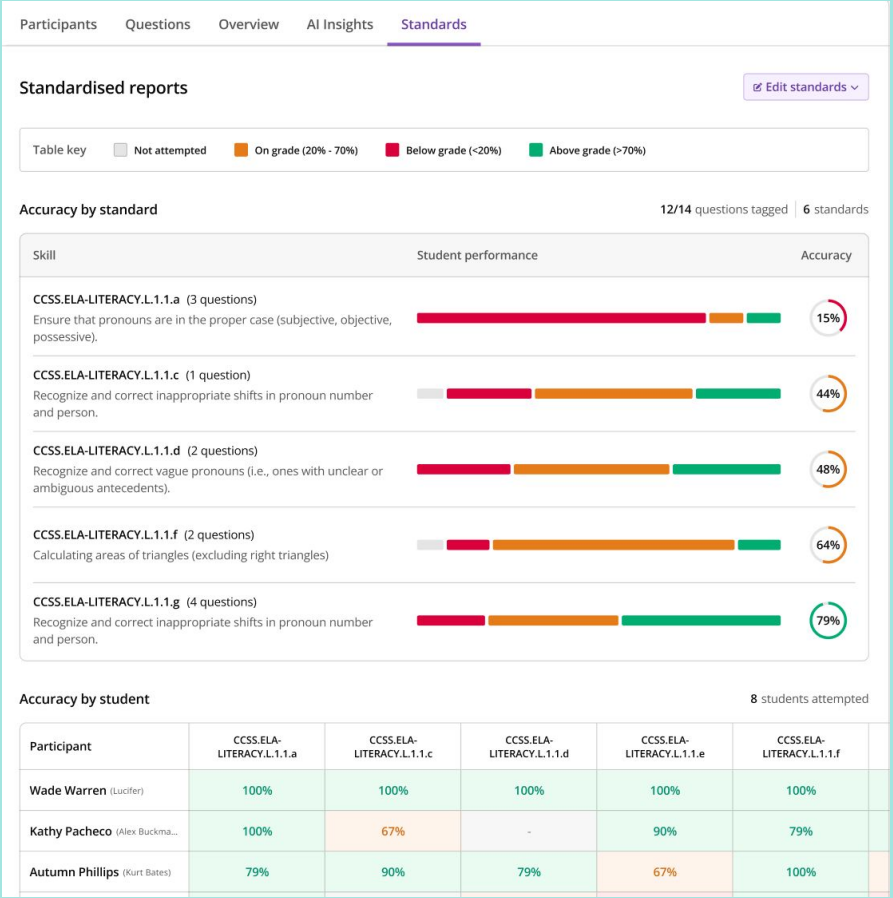
What can be done once teachers have this data? Wayground will surface additional supplemental resources for those students that may be having difficulty in class.





Data

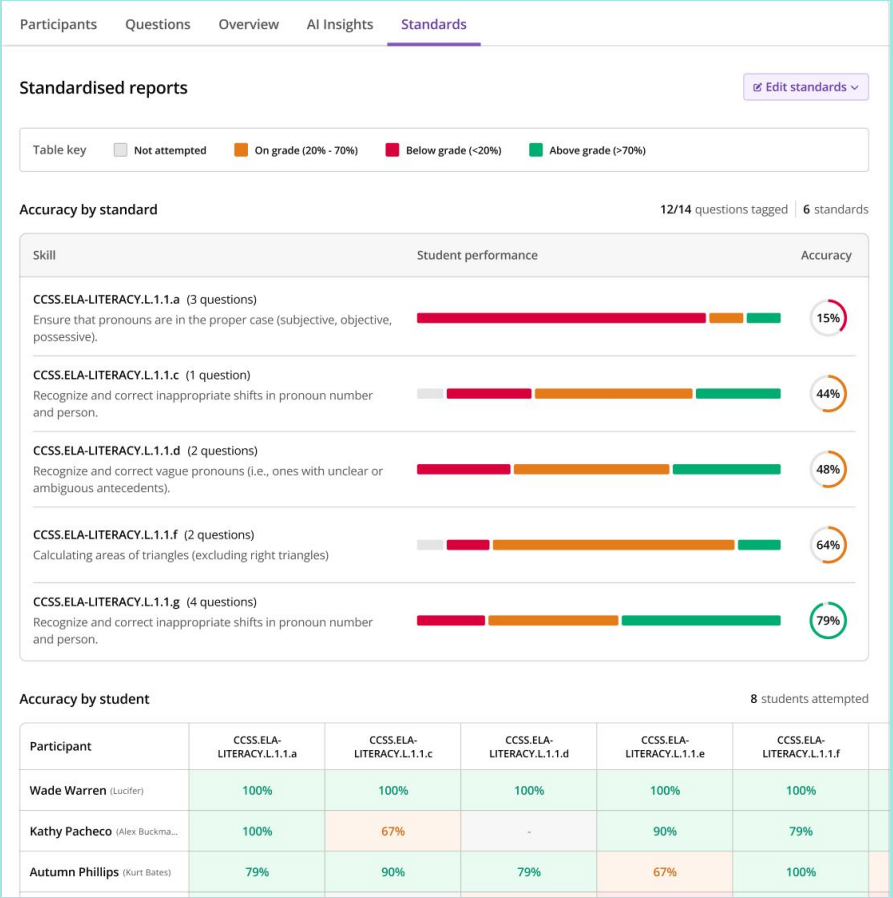
Wayground can focus on state standards! Whichever standards you need, Wayground can parse the data by each individual one for every individual student!



Data

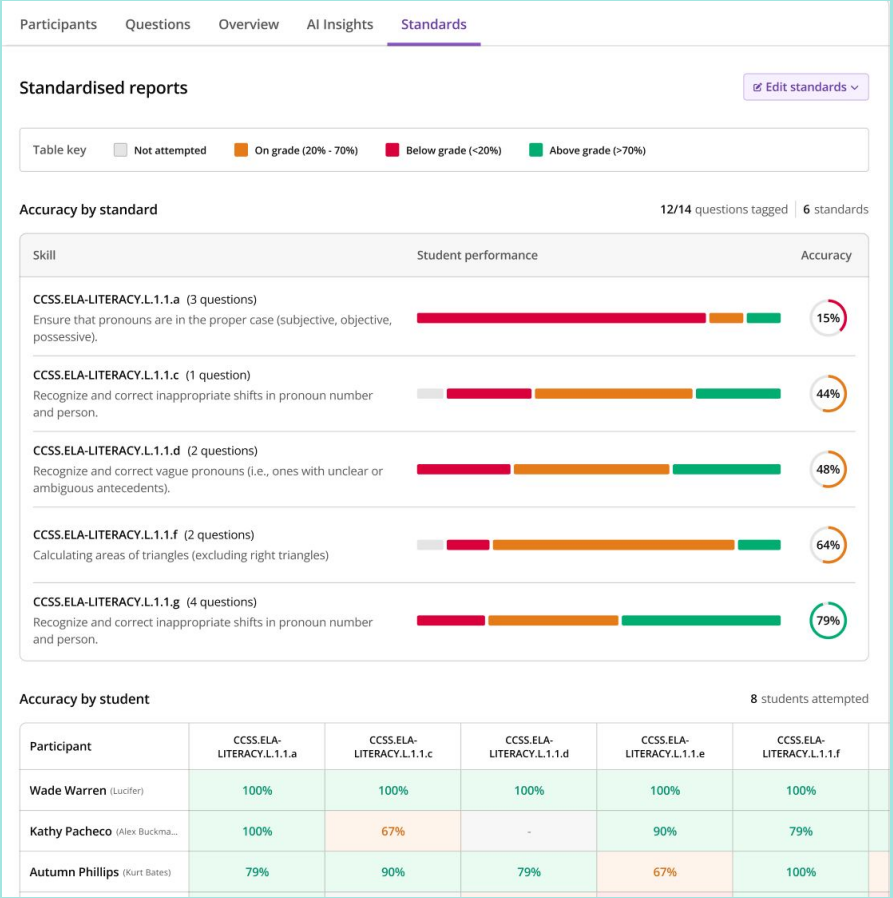
As an admin, you have access to see how all classrooms are performing based on standards that are tagged or chosen. *This can give you insight into what's working in specific classes.*

Are there specific standards that each grade is focusing on across the building? *Target those particular standards in all assignments to gather as much data as you need or for cross curricular activities.*



Data

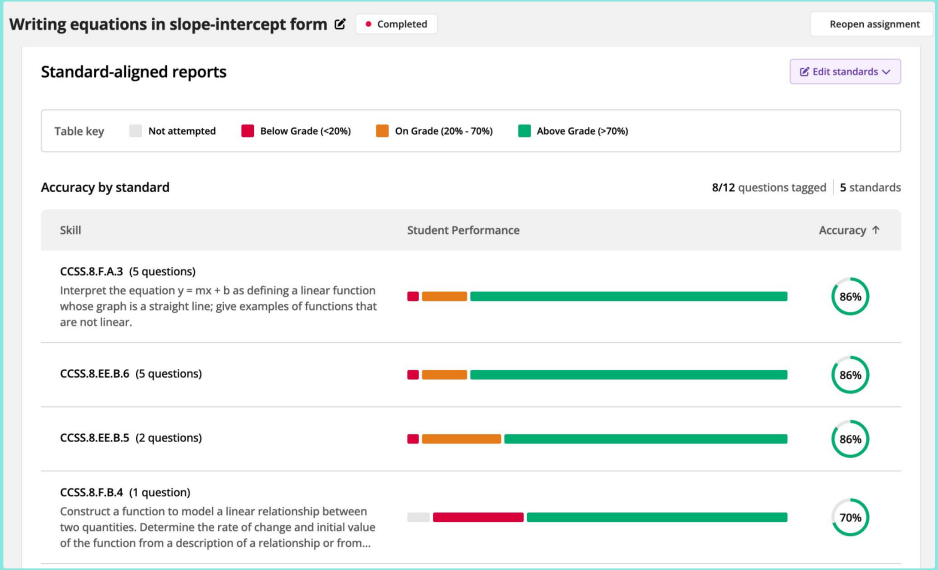
Have an upcoming Institute Day or Faculty Meeting? *Use Wayground Lessons to provide information to your staff and get data back on their thoughts too!*



Use AI to Analyze student performance

Wayground AI helps you

- Automatically generate standard-aligned reports for every activity
- Identify students with specific skill-gaps and assign follow-up activities



Thank You!

We love ***learning*** with you!
